

The Penguin Petition

As a citizens of the Earth we call on all world leaders to protect the Penguins home.

The Antarctic's temperature is rising fast, causing ice sheets to break. This forces many Penguins to walk great distances to find food and their families. Many Penguin communities have shrunk in half.

We are asking you, the President, to do everything in your power to fight global warming.

By signing this petition, we hereby call on you to:

- Establish good economic and environmental policies that protect us.
- Create laws that prevent over-fishing of our already depleted food supply.
- Encourage your constituents to conserve energy and reverse the affects of global warming.

In return for your leadership we promise to do all we can to further this important cause. Our Penguin friends need our help. For them and the sake of all earth's creatures, we ask that you join us in insuring a bright and beautiful future for everyone.

As representatives of the Penguins and future voters we are asking for your help.
